Data Printout - Aviation Occurrence A79O4129**

This printout is issued to provide information on the general circumstances of this occurrence. The information is based upon details provided by participants and other data uncovered to date by the investigation staff. The Transportation Safety Board of Canada (TSB) gathered this information for the purpose of advancing transportation safety. It is not the function of the TSB to assign fault or to determine civil or criminal liability.

A word of caution, some of the information in this document is as provided to the TSB and has not been subjected to further confirmation. Also, the investigation may still be in progress, and therefore, the information is subject to change.
